Supplementary Material - More Results

The following results were generated using our method. The input pairs and the assigned part correspondences are shown on the left and on the right. Shapes resulting from different blending paths are shown in between. All the shapes created are the result of fully automatic blending, while the user only needs to explore using our tool and select what he/she likes.

[ Total pairs = 193 ] [ Total synthesized = 896 ] [ Shapes used = 113 ]
